Research Institute of Soil Science
and Agrochemistry
U.S.S.R.

Dear Dr. Petrossian,

I apologize for thanking you so late for your kind letter of 22nd September, and the interesting publications enclosed. I was most impressed by the size of the treatment described. I am convinced as well that the disposal of waste products for agricultural development is extremely desirable, and your success in this field is of great interest. I would be happy to discuss with you problems like the modification of drainage water during leaching, and the durability of this treatment.

We are publishing a quarterly bulletin called the Sulphur Institute Journal reviewing various aspects of sulphur products uses, which is sent to most research centres and industrial laboratories interested in sulphur. An article from this journal on S amendments is enclosed for your attention. Would you accept a reprint of your leaflet "saline soils retreat" in this publication?

We are planning an international meeting on S in agriculture to be held in Spain (Seville) in 1978, which will be partly concerned with soil reclamation by sulphur containing products. A formal invitation will be sent to you in due time.

Thanking you in advance for your answer, I send you my best wishes for the New Year.

Yours sincerely,

Alain Perrot
Technical Information Officer
